Baltimore, MD 21236

## EDUCATION

---

<b>Williams College</b> , Williamstown, MA	August 2015 - May 2019
Bachelor of Arts in <b>Math with honors</b> and <b>Computer Science</b> , May 2019, GPA- 3.45	
<b>Perry Hall High School</b> , Baltimore, MD	August 2011- June 2015
SAT Reading 710, SAT Math 770, SAT Math-II 780 ACT-34	

## Relevant Courses

---

Taken: Introduction to Python, Data Structures, Computer Organization, Algorithms, Discrete Maths, Theory of Computation, Programming Languages, Operating Systems, Auto-Graders

## EXPERIENCE

---

<b>J.P. Morgan &amp; Chase</b> , <i>Software Engineer</i>	July 2019 – Present
<ul style="list-style-type: none"><li>Developing internal support tools in Java, GraphQL, and React.js tech stack</li></ul>	
<b>Tortoise Investment Management</b> , <i>Summer Analyst</i>	June 2018 – August 2018
<ul style="list-style-type: none"><li>Researched the methodology and sustainability of ESG funds for clients wishing for socially responsible portfolios</li><li>Analyzed client profiles and portfolios to develop their appropriate risk allocations</li><li>Utilized excel and bloomberg terminal to delve into different funds and their specific holdings and sector weights</li><li>Learned about asset allocation, behavioral finance, active vs. passive, equities / bonds</li><li>Implemented a web-crawler to pull in fund expense ratios and global exposure ratios</li></ul>	
<b>Vicious Syndicate</b> , <i>Software Engineer</i>	March 2017 – April 2018
<ul style="list-style-type: none"><li>Wrote functions to data mine large datasets and formatted data into dictionaries for easier data manipulation</li><li>Used Python, Javascript, Flask, HTML and SQL to create a website, data collector, and a database</li><li>Created the first mulligan simulator app, a tool for beginner to intermediate level players to practice the mulligan</li></ul>	
<b>Spring Education Event- Jane Street</b> , <i>Quantitative Trading Program</i>	April 2017 – May 2017
<ul style="list-style-type: none"><li>Learned about general trading terminology, and got exposure to various market making strategies</li><li>Observed traders during opening hours on the trading floor to better understand their role within the firm</li><li>Improved problem solving abilities through exercises in mental calculations, calculating probabilities and expected values, and game theory</li><li>Utilized Excel in a quantitative setting in order to predict Chevron stock prices based on Exxon prices</li></ul>	

## ACTIVITIES

---

<b>Discrete Math/ Introduction to Data Structures</b> , <i>Teaching Assistant</i> , Williamstown, MA	August 2018 – Present
<ul style="list-style-type: none"><li>Taught review sessions and held office hours for peers in need of assistance on course materials covering combinatorics, elementary number theory, discrete maths</li><li>Ran lab classes and assisted helping other students understand computer science concepts, and taught fundamentals in data structures and to reason through and debug code</li></ul>	

## PROJECTS

---

<b>Infection</b> , <i>Momath Hackathon 2018</i> , Javascript
<ul style="list-style-type: none"><li>Utilized an SDK provided by the National Museum of Mathematics to code a game for their touch screen floor</li></ul>
<b>Tropical Cryptography</b> , <i>Tropical Geometry Final Project</i> , Python
<ul style="list-style-type: none"><li>Coded the classic encryption method using tropical linear algebra under the min/plus operations</li></ul>
<b>FracVisual</b> , <i>Fractal Analysis</i> , RShiny
<ul style="list-style-type: none"><li>Created an app that takes in an iterated fractal system, and visually shows the birth of the fractal image</li></ul>
<b>F-Tropical</b> , <i>Programming Language</i> , R- Package
<ul style="list-style-type: none"><li>Created a basic programming language that comprising of a parser and interpreter to graph tropical polynomial curves</li></ul>

## SKILLS

---

**Language:** Fluent in Cantonese, Proficient in Mandarin
